COURSE DESCRIPTION

Coaching is a strategy designed to help under-achieving students be more successful in school and reach the career goals they set for themselves. By working with a coach, students learn how to manage time and tasks, avoid distractions and temptations, and develop good study habits. Coaching is neither tutoring nor counseling, but it is a collaborative process in which students, with guidance and support from a coach, set and pursue goals that are important to them and hone the executive skills they need to achieve those goals.
